EDUCATION

San José State University

BS in Business Administration, Management Information Systems (GPA: 3.6)

San Jose, CA

Graduation Date: May 2024

- Organizations/Awards: SJSU LCoB Dean's Scholar

PROJECTS

Covid-19 Data Exploration

December 2022

- Conducted data exploration using SQL to identify patterns and trends related to the number of cases, and deaths from covid-19.
- Gained experience working with large datasets and utilizing SQL queries to extract and analyze relevant information.
- Maintained a strong focus on accuracy and attention to detail, ensuring that all findings were based on sound statistical principles and rigorous analysis.

Covid 19 Tableau Dashboard

January 2023

- Built dashboards using queries from covid-19 SQL queries, to project findings onto easy to understand visualizations.
- Extracted valuable insights about infections rates and deaths due to covid around the globe that supported the forecast of future rates in each region.
- Analyzed visualizations to understand and view the highest rates of covid-19 in each country.

Data Cleaning in SQL

January 2023

- Utilizing functions such as charindex and substrings to populate columns.
- Inspected the data set to remove any duplicate data and data that was unnecessary for the analysis.
- Imported raw housing data and transformed that data into usable data.

Bike Sales Dashboard in Excel

February 2023

- Reviewed data set to remove any duplicates.
- Performed analysis on bike sales to understand which genders, households etc, were purchasing the most and least amount of bicycles.
- Built an interactive dashboard that allowed users to update and categorize their interests using slicers to see information and data on bike sales.

RESEARCH EXPERIENCE

Backend Design

Milpitas, CA

January 2021– May 2021

- Developed comprehensive entity relationship diagrams and data models for a potential online web store where customers can order ingredients from their favorite recipes.
- Collaborated with cross-functional team members to help design mock cloud architecture models using AWS.
- Created detailed data descriptions that enabled business owners to better understand complex systems and what implementations were added.

LEADERSHIP EXPERIENCE

AVID Tutoring Program

San Jose, CA

Lead of individual Tutoring Stations

August 2018– April 2019

- Partner with 15 other class members to organize and facilitate group tutoring sessions with Sophomore and Junior classes to assist other students in grasping concepts that they were struggling with.
- Adapted to other school subjects that were unfamiliar to me, and developed questions that would help students gather information on how to perform a particular assignment.

SKILLS

- SQL, Tableau, Microsoft Office (Excel, PowerPoint)
